Dear Mr. Gadzik,

1/19/73

Thanks for the courtesy of a stamped envelope.

The only other book printed and not out of print is Photographic Whitewash. It deals with the suppression of the photographic evidence and has a large appendix of facsimile reproduction of once-suppressed documents, largely FBI reports and internal Commission memos. It is $5.00, including postage but not insurance.

If by your question you mean will we ever learn whose fingers pulled triggers, I don't think the prospects are good. If you mean what happened, other than somebosy's dream of what happened, they are better.

The big problems are the unwillingnessx of those of means and influence to get involved, the endless blabbing of the irresponsibles of the dedicated wrong who turn everyone with common sense off, including editors, and thus destroy all credibility, and the glut, mostly awful crap, that leads everyone to believe that everything that can be said has been.

This, of course, is far from the truth. To the degree I can I continue this work and I have learned much that was unproven before.

Thanks much,

Sincerely,

Harold Weisberg
